DETAILED ACTION

Response to Arguments

Applicant's arguments, see page 7-8, filed 7/21/2008, with respect to claim 10, 21 and 23 have been fully considered and are persuasive. The rejection of claim 10, 21 and 23 has been withdrawn.

Allowable Subject Matter

Claim 10, 21 and 23 allowed.

The following is an examiner's statement of reasons for allowance: The present invention directed to a signal processing method and apparatus. The independent claims identify uniquely distinct feature "control unit detects a display resolution and the number of display colors designated by said reproduction procedure, and compares the detected display resolution and number of display colors with the display resolution and the number of display colors of said display device to determine to which memory plane said image signal is to be written." The closest prior arts Parulski et al. (Patent No US 5,241,659), Igarashi (Patent No US 5,045,967) and Hirano (Patent No US 6,885,408) either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
